End Notes

These notes refer to the financial metrics presented on Slide 3.

1. Net Income Applicable to Morgan Stanley.
2. Tangible Common Equity ("TCE") equals common equity less goodwill and intangible assets net of allowable mortgage servicing rights. TCE is a non-GAAP financial measure that the Firm considers useful for analysts, investors and other stakeholders to assess capital adequacy.
3. Prior to January 1, 2018, the Firm estimated its pro forma fully phased-in Supplementary Leverage ratio (SLR) and pro forma fully phased-in Common Equity Tier 1 ratio based on the Firm's assessment of the Basel III final rules and other factors, including the Firm's expectations and interpretations of the requirements at the time. These pro-forma estimates represent non-GAAP financial measures that the Firm considers useful for analysts, investors and other stakeholders to evaluate compliance with new regulatory capital requirements that had not yet become effective.
4. For purposes of determining regulatory compliance, and as reflected in the charts, the capital ratios are the lower of the Standardized or Advanced approaches. For further information, refer to 'Regulatory Requirements' on pages 62-64 in the Firm's Quarterly Report on Form 10-Q for the period ended September 30, 2022.
5. At December 31, 2020, our SLR reflects the impact of a Federal Reserve interim final rule that was in effect until March 31, 2021. For further information, see "Liquidity and Capital Resources—Regulatory Requirements" on Form 10-Q for the period ended September 30, 2022.

These notes refer to the financial metrics presented on Slide 4.

1. The Firm's U.S. LCR calculations are based on our current understanding of the U.S. LCR and other factors, which may be subject to change as the Firm receives additional clarification and implementation guidance from regulators relating to the U.S. LCR, and as the interpretation of the U.S. LCR evolves over time.
2. Represents average daily balance for three months ended September 30, 2022. Under the LCR rule, Eligible HQLA is calculated using weightings and excluding certain HQLA held in subsidiaries.
3. Represents average daily balance for three months ended September 30, 2022. In the first quarter of 2020, the Firm changed its internal measure of liquidity from the Global Liquidity Reserve to Liquidity Resources, which is more closely aligned with the regulatory definition of HQLA. Daily average balances for 2017-2018 represent the Firm's prior Global Liquidity reserve measure. Daily average balances for 2019-2022 represent the Firm's new internal Liquidity Resources measure.
4. Primarily composed of unencumbered U.K., Japanese, French, German, and Dutch government obligations.

These notes refer to the financial metrics presented on Slide 5.

1. Secured funding equals securities sold under agreements to repurchase, securities loaned and other secured financings.
2. Weighted average maturity only includes borrowings with original maturities greater than one year.

These notes refer to the financial metrics presented on Slide 6.

1. Unsecured Debt includes senior unsecured debt, subordinated debt and structured notes.
2. Unsecured Debt balances represent current notional values.
3. Required ratios are inclusive of applicable buffers.

5. Consists of TLAC-eligible LTD reduced by 50% for amounts of unpaid principal due to be paid in more than one year but less than two years from the balance sheet date.
